

Agent rpm install error: unpacking of archive failed on file

If you receive a File Size error during the installation of a Linux rpm-based agent, it is usually the result of a bad file download. To resolve the issue, try downloading the file again or contact uptime Support to request a direct file link.

Example Error:

```
[root@SFILAESX1 vmuser]# rpm -Uvh ptimeAgent-LinuxESX-4.2.4-22.i386.rpm
warning: Expected size: 338495 =
lead(96)+sigs(160)+pad(0)+data(338239)
warning: Actual size: 123338
