# Changing the Windows Agent Port

**Contents**

## Changing the Port using the Agent Console

1. Locate and run the Uptime Infrastructure Monitor Agent Console under the Start menu on the target server.
2. In the application window, update the Port field to the new desired port.
3. Click Save.
4. Click Restart to restart the agent and apply the settings.
5. Note

   If you have already added the server to Uptime Infrastructure Monitor for monitoring, you will also need to update the agent port in the Uptime Infrastructure Monitor web interface.

## Changing the Port Manually

a. Start the Windows Registry Editor by selecting Run from the Start Menu, entering regedit in the Open field of the Run dialog box, and then clicking OK.
b. Find the following registry key:
   HKEY_LOCAL_MACHINE/SOFTWARE/UptimeSoftware/up.time agent

   For older agents, this key may be named: HKEY_LOCAL_MACHINE/SOFTWARE/UptimeSoftware/up.time NT agent
c. Change the value in the Port field to the desired port.
d. Stop and Start the Windows agent by selecting Run from the Start Menu and entering regedit in the Open field of the Run dialog box:
   net stop "up.time agent"
   net start "up.time agent"
   For older agents, the agent service name is up.time NT agent.
