Installing Agents on Solaris

up.time Agents for Solaris are installed at the command line.

To install an agent on Solaris, do the following:

1. Log into the system as user `root`.
2. Using Telnet or FTP, transfer the archive containing the Agent to the system on which you want to install it.
   You should copy the archive to a temporary directory on the system.
3. Extract the archive using the following command:
   tar -xvf <agentName>.tar
   <agentName> will vary depending on which platform and version you are installing (e.g., `uptimeagent-6.0.0-solaris-sparc.tar` or `UPTMagnt-i386-5.0.0.tar`).
4. Run the following command:
   pkgadd -d .
5. Follow the prompts from the `pkgadd` utility to select the Agent package and install it.
