Reference Guide

This guide gives a breakdown of all the service monitors, graphs, and reports that are available in Uptime Infrastructure Monitor.

Administrators will assign individual or groups of service monitors to Elements, and analyze and troubleshoot Element performance through a variety of graphs. Both administrators and business users can respectively use reports to audit assets, and review infrastructure performance.

This guide also outlines settings used to configure Uptime Infrastructure Monitor, or Uptime Infrastructure Monitor's features.

- Service Monitors
- Reports
- Graphs
- Dashboard Gadgets
- Config Settings Reference
- Time Period Definitions
- Alert Profile and Action Profile Variables
