

SNMP service monitor fails to load

Symptom: When trying to add an SNMP service monitor, the applet does not load and generates the following error:

```
Java Plug-in 1.6.0_23 Using JRE version 1.6.0_23-b05 Java HotSpot(TM) Client VM User home directory = C:\\Users\\slatimer
----- c: clear console window f: finalize objects on finalization queue g: garbage collect h: display this help message l:

```

Resolution: This issue is related to the JRE plug-in and up.time's Java middleware using both signed and unsigned code. Please refer to the [Mixing Signed and Unsigned Code](#) article on the Oracle website for a description of the issue and workaround steps.
