What options does the addsystems utility use for WMI

The options format for WMI-based agentless monitoring includes the following fields in addition to the standard element fields:

WMI Domain (optional)
WMI Username
WMI Password

For example:

Host Name: hostname1

Display name: windows machine

Type: WMI Agentless

WMI Username: Administrator

WMI Password: uptime

응응

Host Name: hostname2

Display name: windows machine

Type: WMI Agentless

WMI Username: Administrator

WMI Password: uptime

응응
