

What options does the addsystems utility use for WMI

The options format for WMI-based agentless monitoring includes the following fields in addition to the standard element fields:

```
WMI Domain (optional)
WMI Username
WMI Password
```

For example:

```
Host Name: hostname1
Display name: windows machine
Type: WMI Agentless
WMI Username: Administrator
WMI Password: uptime
%%
Host Name: hostname2
Display name: windows machine
Type: WMI Agentless
WMI Username: Administrator
WMI Password: uptime
%%
```
