

Custom Dashboard - using the URL gadget

Within Uptime Infrastructure Monitor 7.2 or later if looking to add things like the Global Scan or Resource Scan all into one Custom Dashboard you can add them individually using the URL gadget. The following URL's will not have the buttons and the tabs at the top, giving a clean look.

Global Scan

<http://localhost/main.php?section=GlobalScanMainPageGroups&subsection=list>

Resource Scan

<http://localhost/main.php?section=GlobalScanResourceScan&subsection=list>

All services

<http://localhost/main.php?section=GlobalScanAllServices&subsection=list>

All Elements

<http://localhost/main.php?section=GlobalScanAllEntities&subsection=list>

SLA

<http://localhost/main.php?section=GlobalScanSlas&subsection=list>

Applications

<http://localhost/main.php?section=GlobalScanApplications&subsection=list>

Network

<http://localhost/main.php?section=GlobalScanNetworkDevices&subsection=list>
