File System Capacity Monitor string not matching

The string-based mount matching within the file system capacity monitor is designed to accept a * wildcard at the end of the string only. Full regular expression matching is not currently supported.

Functional Examples:

/uo* - matches all: /u01, /u02, etc.
/u01 - matches just /u01

Invalid Examples:

tmp
/oracle/???/sapdata*
/*/*/sapdata*
