

Custom VBS script error due to wrong locale

The up.time Windows agent uses the English US locale as its default setting. If a VBS script is handling dates and expecting them in a different format, add the following line at the beginning of the script with the appropriate country code:

```
SetLocale(xxxx)
```

For example: SetLocale(2057) for English UK

For a list of Locale IDs, please see the [Reference List](#) on the Microsoft MSDN site.
