SMTP Error 553: sorry, that domain isn't in my list of allowed rcpthosts

This error typically indicates that the SMTP server you have configured Uptime Infrastructure Monitor to relay messages through requires authentication, or that the user you are authenticating as doesn't have permission to send through this server.

If you are not using authentication, confirm with your email administrator if it is required.

If you are using authentication, forward your SMTP settings in Uptime Infrastructure Monitor to your email administrator for review.
